

# DANIEL EDWARD CHAMBERLAIN

Date of birth: 10<sup>th</sup> November 1968

Nationality: British

Dipartimento di Scienze della Vita e Biologia dei Sistemi  
University of Turin  
Via Accademia Albertina 13  
10123 Torino  
Italy

Tel: 011 6704534

Email: dan.chamberlain99@gmail.com

## Further Education

1990-1994 The Edward Grey Institute of Field Ornithology, University of Oxford.  
D.Phil. in Animal Ecology, March 1994.

1987-1990 Oxford Polytechnic.  
B.Sc. in Environmental Biology. Awarded First Class Honours.

## Current research

I am a Full Professor in Ecology, a role that includes both teaching (ecology, conservation and statistics) and research, which is mostly linked to impacts of environmental change on biodiversity, in particular the impacts of environmental change on high alpine ecosystems, impacts of urbanization and socioeconomic development on birds, and the impacts of agricultural intensification on biodiversity.

A main goal of my research is to publish scientific papers and I have authorship on 106 papers published or in press in ISI journals (as at 13/03/2020). My current H-index is 44 (GoogleScholar). A full list of publications is attached below.

Ongoing projects include: Interacting effects of climate and vegetation on the distribution and demography of Alpine birds; the ecology of an Alpine population of Wheatears; the effects of socioeconomic development on urban biodiversity in the developing world; patterns of species richness along altitudinal gradients at different spatial scales in Alpine carabids; surveying cryptic species using passive acoustic monitoring; scientometric meta-analysis of article features that increase citations.

In 2019, I was awarded the Marsh Award for Ornithology for significant contributions in this field.

## Research experience and employment

### ***Assistant/Associate Professor, University of Turin (Sept 2012 – March 2021)***

Research into the impacts of climate change on birds and other taxa, with a particular focus on high alpine biodiversity.

### ***Marie Curie Fellow, University of Turin (Feb 2010 – January 2012)***

Research into the impacts of climate change on birds and other taxa, with a particular focus on high alpine biodiversity.

**Principal Ecologist – Climate Change and Head of Population Ecology and Modelling, British Trust for Ornithology, Thetford, UK (Aug 2008-Jan 2010)**

Lead in developing BTO's climate change research portfolio. Management of the Population Ecology and Modelling Team (5 staff), which has particular expertise in spatial modelling, demography and climate change. During my tenure, I secured c. £500,000 in funding and expanded the unit from three to five staff.

**Research Ecologist, British Trust for Ornithology, Thetford, UK (Sept. 1994 – Aug. 2008)**

Research into a range of issues involving bird-habitat relationships, e.g. demographic drivers of farmland bird populations, effects of organic farming on biodiversity, effects of acidification on bird populations, density-dependent habitat use of breeding birds.

### **Teaching and communication skills**

**Teaching** – Animal Ecology (MSc Level, in English), Statistics for Environmental Biology (MSc Level, in English), Ecology (BSc level, in Italian); BSc and MSc thesis supervision on various topics (c. 4-5 students/year); PhD supervision (co-supervisor of 5 students in UK, 2003-2010; supervisor of 3 students at University of Turin, 2014-2021). I contribute to doctoral courses on statistics (generalized linear modelling) and scientific writing and publishing.

**Conferences and workshops:** I have 30 years' experience of presenting scientific results to both different audiences (i.e. academic, conservation NGOs and members of the public) on diverse ecological topics, both in English and in Italian. I have been a regular contributor to the British Ornithologists' Union, the European Ornithologists' Union, the European Bird Census Council and the Centro Italiano Studi Ornitologici conferences. I was the principal organizer for the Landscape Ecology and Birds Conference (University of East Anglia 2002) and have organized several symposia at other conferences.

### **Refereeing and editing skills**

I have extensive experience of the peer-review process. I act as a referee for a wide range of ecology journals (examples from the last five years include Ecology Letters, Global Ecology and Biogeography, Diversity and Distributions, Journal of Applied Ecology, Journal of Animal Ecology, Ecography, Biological Conservation, American Naturalist). I edited the conference proceedings for the IALE Conference '*Avian Landscape Ecology: Pure and Applied Issues in the Large-Scale Ecology of Birds*'. I have also acted as a referee for national and international funding bodies, including the Natural Environmental Research Council and the Biotechnology and Biological Sciences Research Council (UK), L'Oreal Fellowships for Women in Science (Austria), the National Research Foundation (South Africa), the Netherlands Organization for Scientific Research (Netherlands) and the Executive Agency for Small and Medium-sized Enterprise (European Union). I am an Associate Editor for Bird Study and am currently a Deputy Editor for Ibis.

### **Collaborations**

I have participated in a wide range of collaborative projects at both National and International levels.

**National collaborations (Great Britain):**

- Principal Researcher for the project 'Biodiversity Impacts of Climate Change Observation Network' with the Centre for Ecology and Hydrology, Rothamsted Research Institute, Butterfly Conservation, Bat Conservation Trust and Forest Research (2009-2010);
- Research on the ecology of urban birds with the University of Sheffield (2002-2005);

- Research on the impacts of bird feeding with the University of Birmingham, the University of Exeter and Queen's University Belfast (2004-present);
- Research on farmland biodiversity in collaboration with the University of Oxford, the University of East Anglia, the University of Reading, the University of Newcastle, the Royal Society for the Protection of Birds, the Central Science Laboratory, the Centre for Ecology and Hydrology, the Game Conservancy and Natural England (1999-2008);
- Research on the impacts of renewable energy on birds with Scottish Natural Heritage and Natural England (2003-2005).

**International collaborations:**

- Principal Researcher for the project 'Climate Change Impacts on Avian Interests of Protected Area Networks' with the Natural History Museum Paris and the University of Leeds (UK) (2009-2010);
- Researcher on the EU-funded FP6 project 'BioAssess' with partners in Finland, France, Hungary, Ireland, Portugal, Spain and Switzerland (2000-2004);
- Participation on a research project considering trends in bird and butterfly populations in relation to climate change at a European scale, coordinated by CNRS (France), including partners from the Netherlands, Spain, Finland, Sweden, the Czech Republic and Germany (2009-2011).
- Principal Researcher in a project to identify future lines of research for alpine birds, with the Swiss Ornithological Institute, the University of Berne and Museo della Scienze di Trento (2011-present).
- Project to evaluate the threats to bird populations in high alpine environments, with the Museo della Scienza di Trento and the Centre for Ecology and Hydrology, UK (2010-2016).
- An assessment of urban bird populations spatial and temporal trends in Kampala, with Makerere University, Uganda (2014-present).
- Project to assess the links between socioeconomic development and urban biodiversity with the University of Cape Town, Georg-August-Universität Göttingen and MTA Centre for Ecological Research, Tihany, Hungary (2017-present).
- Scientometric analysis identifying features of scientific papers that promote higher citations rates, in collaboration with the University of Helsinki, Finland.
- Impact of non-native bird species on native biodiversity, and the role of urbanization in this relationship, in collaboration with the University of Lisbon, Portugal.
- Ecology of the Alpine Ibex in the Western Alps – effects of climate, habitat and disturbance, as part of the project LEMED-IBEX, an INTERREG project financed by the European Commission, with Italian, French and Swiss partners.
