Name: Sheila J. Sadeghi

Titles: PhD, DIC Higher Education:

PhD in Biotechnology (University of London, Imperial College, United Kingdom). MSc in Biotechnology (University of London, Imperial College, United Kingdom). Also awarded the Diploma of Imperial College.

APPOINTMENTS

present: Researcher, Faculty of Sciences, University of Turin, Italy. 2006: Research fellow, Division of Molecular Biosciences, Faculty of Natural Sciences, Imperial College London, **United Kingdom**. 2002-2005: Postdoctoral research associate, Department of Cellular and Molecular Pharmacology, University of California in **San Francisco, USA**. 2000-2001 Lecturer in the Biochemistry Department, **Imperial College London**. 1997-2000 Postdoctoral research associate, Biochemistry Department, Imperial College.

Relevant Experience:

Author of more than 30 international publications in the field of protein engineering and redox enzymes, 4 contributions to specialised edited books. Invited speaker at 7 international conferences and 2 postgraduate workshops.

TEACHING EXPERIENCE

Imperial College London (academic years 2000-2001 and 2001-2002)

For two years as a lecturer in the Biochemistry Department (Imperial College London), have demonstrated success in delivering lectures to undergraduate students as part of the department's teaching committee. Contributions were made to three different courses namely Biomolecular Mechanisms, Molecular Cell Biology and Damage and Repair in Biological Systems within the Biochemistry syllabus. The latter included a total of 30 lectures plus laboratory-based practicals. As part of the duties also set exam questions and marked papers, and sat in committees for awarding degrees to the students.
